

Nikuni Regenerative Turbine Pumps for High Quality Applications

Simple Structure ♦ Precision Machined
Robust ♦ Quiet Operation
High Pressure ♦ Small Flow Rate

Due to their design, Nikuni's regenerative turbine pumps have stable operation. Pressure differences do not cause a large flow rate difference.

Problems with Galvanic corrosion?

The stainless steel impeller in Nikuni's regenerative turbine pumps is highly resistant to galvanic corrosion.

Performance does not have to go down with continuous operation. By using Nikuni's precision regenerative turbine pumps, you can reduce down time, maintenance fees, and life cycle costs.

Nikuni Regenerative Turbine Pumps for High Quality Applications

Many advantages over traditional regenerative turbine pumps!

D Series

Super Cost Performance

**Stainless Steel
Lead-free Copper**

Total Head: Max. 110m
Flow Rate: Max 75 L/min
Liquid Temp.: -4°F ~ 248°F

BKX Series

DC Brushless and Sealless

No Mounting Restrictions

Ultra Compact
High Pressure, Small Flow Rate
No Leakage

Total Head: Max. 60m
Flow Rate: Max 16 L/min
Liquid Temp.: 14°F ~ 176°F

NPD Series

Mechanical Shaft and Seal

**Stainless Steel
General Purpose**

Total Head: Max. 60m
Flow Rate: Max 130 L/min
Liquid Temp.: -4°F ~ 194°F

Nikuni Regenerative Turbine Pump Features

- ◆Machined stainless steel impeller◆

- ◆Designed with a focus on parallelism, perpendicularity, and concentricity◆

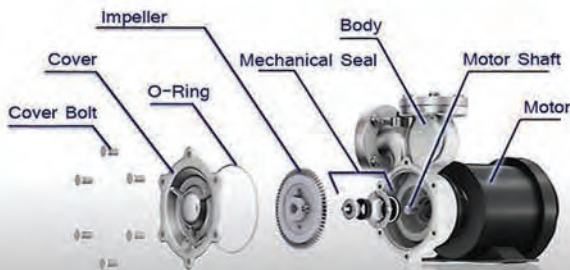

- ◆Resistant to cavitation◆

- ◆Flow is easy to reverse◆

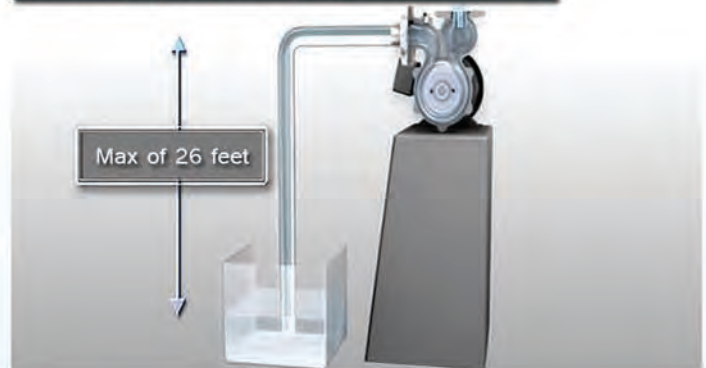

- ◆Easy maintenance◆

- ◆Max head of 26 feet:
small flow rate, high head◆

Simple Maintenance
